

6TH INTERNATIONAL CONGRESS ON OCT ANGIOGRAPHY AND ADVANCES IN OCT

Rome

December 14 and 15, 2018

Ergife Palace Hotel

Via Aurelia, 619

Minor changes may still occur

**SIMULTANEOUS TRANSLATION ENGLISH, FRENCH, ITALIAN
IN THE PLENARY HALL AND IN HALLS A AND B
HALLS C – D and E: Official language: ENGLISH**

FRIDAY DECEMBER 14

8.00 – 8.45 – **ADVANCED OPTOVUE SYMPOSIUM** – HALL A

Moderator: Bruno Lumbroso

Bruno Lumbroso – Introduction

Eric Souied – Detection and classification of CNV with OCTA

Amani Fawzi – OCTA signal in atrophy: CNV or residual choroidal vessels?

Bruno Lumbroso – How to determine CNV activity with OCT and OCTA? Long- term follow-up

Marco Rispoli – The role of OCTA in dry AMD

Salomon Yves Cohen – How does OCTA fit in the everyday imaging armamentarium? And how can it guide treatment decisions?

8.00 – 8.45 – **HEIDELBERG SYMPOSIUM** – HALL B

FRIDAY MORNING

HALL A+B

1. AMD 1

Chairs: Daniel Pauleikhoff, David Sarraf, Srinivas Sadda, Nadia K. Waheed, Salomon Yves Cohen

9.00 - Daniel Pauleikhoff - Pigment epithelial detachment in exudative AMD

9.07 - Nadia K. Waheed - Evolutive changes in wet AMD

9.14 -Aude Ambresin - Influence of structural OCT characteristics in the detection of CNV due to AMD using OCT Angiography

9.21 - Florence Coscas, Diogo Reis Cabral, Gabriel Coscas, Eric Souied – OCT Angiography biomarkers in AMD

9.28 - Discussion

Key Note Lecture

David Sarraf - RAP: advanced retinal imaging of Type 3 NV

2. CLASSIFICATION OF ATROPHY AND NEOVASCULARIZATION IN AMD

Chairs: David Sarraf, Eric Souied

9.48 - Adnan Tufail - OCT classification of atrophy in AMD

9.55 - K. Bailey Freund - OCT classification of NV in AMD

10.02 - David Sarraf - OCTA classification of NV in AMD

10.09 - Discussion

3. ADVANCED RETINAL IMAGING OF PED

Chairs: David Sarraf, Daniel Pauleikhoff

10.14 - Adrian Au – 3D OCTA volumetric analysis of the progression of vascularized serous PED

10.21 - David Sarraf - OCT and OCTA evaluation of the mechanism of RPE tears associated with PED

10.28 - Daniel Pauleikhoff, Frederic Gunnemann - OCTA analysis to assess the response of ped and rpe-tears to Anti VEGF therapy

10.35 - Discussion

INAUGURAL LECTURE

Chair: Quan Dong Nguyen

Key Note Lecture

Chair: Quan Dong Nguyen

11.00 - Philip J. Rosenfeld - Advances in choriocapillaris imaging (techniques) and imaging of the choriocapillaris in AMD

ROUND TABLE: OCTA AND EVERYDAY OPHTHALMOLOGY TODAY

Philip J. Rosenfeld, Bruno Lumbroso, Caroline Baumal, Karl Csaky, Murata Toshinori
How has OCTA has changed clinical management

Keynote Lecture

Chair: David Sarraf

K. Bailey Freund - Update on Pachychoroid disease

4. VISIONS OF FUTURE BY INDUSTRY SENIOR EXECUTIVES

Chairs: James G. Fujimoto, Bruno Lumbroso

11.45 - Optovue - Jay Wei

11.52 - Zeiss - Angelo Rago?

11.59 - Nidek - Riccardo Ferraris de Gaspare - Future of multimodal Wide Field imaging

12.06 - Topcon - Carl Glittenberg

12.13 - Heidelberg Engineering - Tilman Otto

12.20 - Optopol - Arkadiusz Chalecki - Newest OCT developments

12.27 - Canon - Ori Zahavi: The future with Canon

12.35 – 13.25 NIDEK LUNCH SYMPOSIUM

12.30 - 14.00 - Lunch break

FRIDAY AFTERNOON

HALL A

5. OTHER CNV

Chairs: Martine Mauget-Fayssse, Benjamin Wolff, Yves Salomon Cohen

14.00 - Sabine Derrien, Elise Scemama-Boulanger, Elsa Laumonier, Benjamin Wolff, Flore DeBats, Vivien Vasseur, Martine Mauget-Fayssse - Choroidal new vessels in hereditary dystrophies

14.07 - Elisabetta Pilotto - Retinal function in vascularized fovea

14.14 - Yves Salomon Cohen - Vascular remodelling of myopic choroidal neovascularization treated with Ranibizumab

14.21 - Discussion

6. APPLICATIONS OF PROJECTION-RESOLVED OCTA

Chair: David Huang, Min Wang

14.26 - David Huang - Classification of choroidal neovascularization using projection-resolved OCTA

14.33 - David Huang - Unequal flow alteration in retinal plexuses in different conditions - evidence against series circuit model of retinal blood flow

14.40 - David Huang - Early detection of diabetic retinopathy with projection-resolved OCTA

14.47 - Amani Fawzi - Plexus-specific manifestations of retinal diseases

14.54 - Min Wang - Clinical application of 3D PAR of OCT Angiography

15.01 - Discussion

7. EXUDATIVE CNV AMD 4

Chair: Rufino Silva

15.06 - Rosa Dolz-Marco - Checklist of neurodegenerative changes in patients with AMD

15.13 - Roberto Gallego-Pinazo - Relevance of the tomographic classification of CNV in patients with AMD

15.20 - Miguel Raimundo - Sensitivity and specificity of a fully non-invasive approach (OCT+OCTA) for the diagnosis of wet AMD

15.27 - João Pedro Marques - Nonexudative CNV in AMD

15.34 - Marco Lupidi - Hemodynamics of choroidal Cnvs in AMD

15.41 - Rufino Silva - OCTA in type 3 CNV and fellow eyes

15.48 - Massimo Nicolò - Early diagnosis of RAP with swept-source OCT and Angio-OCT

15.55 - Discussion

8. NON-EXUDATIVE CHOROIDAL NEOVASCULARIZATION

Chairs: David Huang, Nadia K. Waheed, Philip J. Rosenfeld

16.00 - David Huang - Non-exudative CNV is a precursor to exudation

16.07 - Nadia K. Waheed - Vascularized drusen in age-related macular degeneration

16.14 - Philip J. Rosenfeld - OCTA imaging of subclinical non-exudative macular neovascularization

16.21 - Daniel Martin - Clinical trial of prophylactic anti-angiogenic therapy in high risk age-related macular degeneration

16.28 - Discussion

9. MORPHOLOGY-AND OCTA

Chairs: Barbara Blodi, Thomas Theelen

16.33 - Thomas Theelen, Vivian Schreu, Artin Domanian, Bart J. Liefers Venhuizen, Freerk G., B. Jeroen Klevering, Eiko K. de Jong, Carel B. Hoyng - Morphological and topographical appearance of microaneurysms on Optical Coherence Tomography

Angiography

16.40 - Barbara Blodi - Quantification of drusen dynamics using Optical Coherence Tomography (OCT)

16.47 - Ioannis P. Theocharis - Drusen tectonics and mechanical interpretation of posterior pole kinetics

16.54 - Vivien Vasseur, Anne Sophie Alonso, Sabine Derrien, Sophie Thevenin, Laurence Salomon, Martine Mauget-Faÿsse - *En face* OCT interdigitation zone analysis

17.01 - Discussion

10. PATHWAYS OF DISEASE AND PHENOTYPES OF PROGRESSION IN DIABETIC RETINOPATHY

Chairs: José Cunha Vaz, Anat Loewenstein, Francesco Bandello

17.06 - Edoardo Midena - Neurodegeneration

17.13 - Isabel Pives - Retinal edema

17.20 - Mariacristina Parravano - Microvascular changes

17.27 - José Cunha Vaz - Microaneurysms turnover

17.34 - Tiago Rodrigues - Peripapillary and macular neurovascular coupling in early diabetic retinopathy

17.44 - Discussion

11. DIABETIC RETINOPATHY 2

Chairs: Francesco Bandello, Nadia K. Waheed, Anat Loewenstein

17.49 - Sobha Sivaprasad - Imaging and management of PDR

17.56 - José Cunha-Vaz - Biomarkers of diabetic retinopathy progression and treatment response

18.03 - Patricia Udoando, Omer Trivizki - Steroids or VEGF for diabetic retinopathy - imaging parameters and clinical use

18.10 - Dafna Goldenberg - OCT and OCTA in diabetic macular edema

18.17 - Marco Lupidi, Felice Cardillo-Piccolino, Anna Caricato, Gabriel Coscas, Carlo Cagini - OCT Angiography assessment of retinal neovascularizations in proliferative diabetic retinopathy

18.24 - Caroline Baumal - Features of proliferative diabetic retinopathy

18.31 - Discussion

18.36 - End of the sessions

19.50 - Bruno Lumbroso cocktail for the speakers

19.00 - 21.00 - ZEISS Event "Experiencing OCT/OCTA after the theory during the day"

HALL B

12. NORMAL RETINA AND VASCULAR DISORDERS

Chairs: Richard Rosen, Dimitra Skondra, Leopold Schmetterer, Suqin Yu

14.00 - Dimitra Skondra, Chun Ba - Differences in macular vascular microenvironment between black and white subjects using Optical Coherence Tomography Angiography

14.07 - Suqin Yu, Xinxin Li, Xun Xu - Quantitative analysis of vessel density in patients with PAMM lesions using 3D PAR OCTA

14.14 - Sandrine Zweifel - Pilot- Project for the detection of retinal arterial (micro) emboli after transcatheter aortic valve implantation using OCTA and Fluorescence Angiography

14.21 - Leopold Schmetterer, Jacqueline Chua, Bingyao Tan, Calvin Woon, Loong Chin - Impact of systemic hypertension on choriocapillaris flow voids using Optical Coherence Tomographic Angiography

14.28 - Discussion

13. TELANGIECTASIA 1

Chairs: Daniel Pauleikhoff, Ethan Priel

14.33 - Daniel Pauleikhoff - Progression of vascular changes in OCT-A in macular Teleangiectasia type 2

14.40 - Ethan Priel - OCTA in Mac Tel – New and complementary multi-modal imaging findings

14.47 - Discussion

14. TREATMENT AMD AND VASCULAR DISORDERS 1

Chair: Edoardo Midena

14.52 - Sandro Saviano - Aflibercept monotherapy for PCV: the PLANET study

14.59 - Simone Donati - Diabetic retinopathy with or without DME: new treatment options

15.06 - Edoardo Midena - Recent advances for Aflibercept in AMD

15.13 - Discussion

15. THE PILLARS FOR AN OPTIMAL MANAGEMENT OF MACULOPATHY

Chairs: Giovanni Staurenghi, Benjamin Wolff

15.18 - Enrico Peiretti - Maculopathies: a correct approach for a chronic disease

15.25 - Maurizio Battaglia Parodi – Proven efficacy and safety: from clinical studies to real practice

15.32 - Angelo Minnella - The importance of early diagnosis and early treatment in the clinical practice: the Luminous study

15.39 - Michele Reibaldi - Clinical and organizational appropriateness: an indispensable combination

15.46 - Benjamin Wolff - The experience of a center of excellence

15.53 - Discussion

16. NEUROOPHTHALMOLOGY 1

Chairs: Albert Augustin, Richard Rosen

15.58 - Albert Augustin - OCT Angiography and *En face* OCT in neuroophthalmology, update

16.05 - Richard Rosen - The role of OCT A in the diagnosis and management of Optic Neuropathies

16.12 - Umur Kayabasi - Arteritic vs. non arteritic anterior ischemic optic neuropathy: vascular analysis of the optic nerve head

16.19 - Gilda Cennamo - Assessment of the peripapillary vascular network in hereditary Optic Neuropathies

16.26 - Marco Lupidi - OCTA in the evaluation of optic neuritis during the course of Multiple Sclerosis

16.33 - Dilraj Grewal - Retinal microvasculature and neurodegenerative changes among Alzheimer's disease, mild cognitive impairment, and controls

16.40 - Discussion

17. ANGIO-OCT AND OCT IN NEURO-OPHTHALMIC DISEASES

Chairs: Y. Joyce Liao, Randy Kardon, Quan Dong Nguyen

16.45 - Randy Kardon - OCTA and OCT structure-function correlation and laser speckle blood flow

16.52 - Y. Joyce Liao - OCT analysis of vascular changes in optic neuropathies

16.59 - Heather Moss - Retinal vessels in states of high intracranial pressure

17.06 - Min Wang - OCTA imaging in neuro-ophthalmic diseases

17.13 - Shannon Beres - OCT and OCTA imaging in pediatric neuro-ophthalmology

17.20 - Isabella Grumbach - Deep learning approaches to vascular analysis

17.27 - Discussion

18. TREATMENT AMD AND VASCULAR DISORDERS 3

Chairs: José Cunha Vaz, Ugo Menchini

17.32 - José Cunha Vaz - Fluocinolone Acetonide: current indications and outcomes

17.39 - Rosangela Lattanzio - Fluocinolone acetonide in DME: real world experience

17.46 - Giacomo Panozzo - Dexamethasone intravitreal implant at the time of cataract surgery in eyes with DME

17.53 - Marco Lupidi - Shall we stay, or shall we switch? Continued Anti-VEGF therapy versus early switch to dexamethasone implant in refractory diabetic macular edema

18.00 - Ryo Kubota - Positive diabetic retinopathy outcomes with Emixustat

18.07 - Ana Rita Santos, Dalila Alves, Jay C. Wang, Inês Laíns, Rufino Silva, João Figueira, José G. Cunha-Vaz - Choroidal predictors for visual response to Anti-VEGF treatment in DME patients, using Swept Source OCT

18.14 - Pavol Kusenda - Treat and extend vs. fixed regimen for the treatment of wet age-related macular degeneration in treatment-naïve patients – Twelve-month real-life outcomes

18.21 - Ryo Kubota - A novel oral therapy for Stargardt disease

18.28 - Discussion

18.33 - End of the sessions

HALL C

19. OTHER RETINAL DISORDERS 1

Chairs: Martine Mauget-Faÿsse, Benjamin Wolff, Jinfeng Qu

14.00 - Jinfeng Qu, Xiaoxin Li - Coherence Tomographic Angiography in acute macular neuroretinopathy

14.07 - Claire Scemama-Timsit, Elise Scemama-Boulanger, Elsa Laumonier, Sabine Derrien, Vivien Vasseur, Cédric Lamirel, Martine Mauget-Faÿsse - Retinal OCT as a marker in patients with dominant atrophy and Wolfram syndrome

14.14 - Vivien Vasseur, Martine Mauget-Faÿsse - *En face* OCT interdigitation zone analysis

14.21 - Martine Mauget-Faÿsse, Vivien Vasseur, Romain Deschamps - Acute macular neuropathy: a new risk factor

- 14.28 - Céline Giraud, Catherine Favard, Vivien Vasseur, Benjamin Wolff, Martine Mauget-Fayssse** - OCT-A PCV classification
14.35 - Joseph Carroll - OCTA imaging in congenital achromatopsia
14.42 - Ugo Introini - Focal choroidal excavation
14.49 - Discussion

20. OTHER RETINAL DISORDERS 2

Chairs: Martine Mauget-Fayssse, Joseph Carroll, Luisa Pierro, Marco Lupidi

- 14.54 - Luisa Pierro** - High Hyperreflective Spikes, HFS, a new SDOCT foveal abnormality sign
15.01 - Alessio Cerquaglia, Marco Lupidi, Carlo Cagini - New-insights on ocular Sarcoidosis: an OCT Angiography assessment
15.08 - Catherine Favard, Eric Frau, Sarah Tick, Martine Mauget-Fayssse - Contribution of SSOCT and SSOCT-Angiography to the analysis of Circumscribed Choroidal Hemangiomas
15.15 - Moaetz Billah Mekki, Amine Taibi, Mourad Abdelbaki, Hadi Chakkor, Mohamed Karim Belkacem Chabani, Ramzeddine Belaoudmou, Said Yahiaoui, Okba Titah - Relation between the Angio OCT macular density map (AOMDM) in patient with coronary disease versus healthy persons
15.22 - Discussion

21. AMD 6

Chairs: Vittorio Capuano, Marco Rispoli, Yusuf Durlu

- 15.27 - Rita Serra, Florence Coscas, Diogo Cabral, Marco Lupidi, Jean François Boulet, Gabriel Coscas, Eric Souied** - Long-term progression of treatment-naïve quiescent choroidal neovascularization in intermediate age-related macular degeneration, by multimodal imaging and Optical Coherence Tomography Angiography
15.34 - Vittorio Capuano, Giuseppe Querques, Eric Souied, Francesco Bandello - Pigment epitheliumdetachment *dimple* as a result of hyperreflective sub-retinal membrane
15.41 - Iori Wada, Shintaro Nakao, Yoshihiro Kaizu, Muneo Yamaguchi, Mitsuru Arima, Keijiro Ishikawa, Kumiko Kano, Satomi Shiose, Yuji Oshima, Tatsuro Ishibashi, Koh-Hei Sonoda - The evaluation of disease activity in exudative age-related macular degeneration using *En face* hyperreflective foci
15.48 - Vittorio Capuano, Giuseppe Querques, Eric Souied, Francesco Bandello - Vascular remodelling in geographic atrophy secondary to non-exudative AMD
15.55 - Marco Lupidi, Felice Cardillo-Piccolino, Gabriel Coscas, Carlo Cagini - Hemodynamic variations in choroidal neovascular lesions
16.02 - Yusuf Durlu - OCT and OCT Angiography findings in asymptomatic patients with exudative age-related macular degeneration
16.09 - Discussion

22. TREATMENT AMD AND VASCULAR DISORDERS 4

Chairs: Mate Strehö, Luca Di Antonio, Daniela Bacherini, Ana Rita Santos

- 16.14 - Maté Strehö, Violaine Caillaux, Charlotte Sevin, Marie Julie Bovis** - OCT-A follow-up of radial peripapillary vascularisation during IVI for AMD treatment
16.21 - Maria Oliva Grassi, Claudio Furino, Recchimurzo N, Alessio G - Retinal vessel analysis on OCTA immediately after Anti-Vegf intravitreal injection
16.28 - Claudio Furino, Grassi Maria Oliva, Montepara A, Alessio G. - CNV treated with Ranibizumab and Aflibercept and evaluated by OCTA
16.35 - Discussion

23. AMD 7

*Chairs: Ursula Schmidt-Erfurth, Alexandra Miere, **Martin Michl** **NON VIENE***

16.40 - NON VIENE Martin Michl, Bianca S. Gerendas, Xiaofeng Hu, Sebastian M. Waldstein, Amir Sadeghipour, Ursula Schmidt-Erfurth - The degree of foveal photoreceptor disruption in treatment-naïve neovascular age-related macular degeneration and diabetic macular edema

16.47 - Alexandra Miere, Giuseppe Querques - Sub-retinal pigment epithelium multilaminar hyperreflectivity is often seen at the onset of type 3 neovascularization

16.54 - Joana Providência, Miguel Raimundo, João Pedro Marques, Rufino Silva - OCT Angiography biomarkers in neovascular age-related macular degeneration

17.01 - Florence Coscas, Diogo Ries Cabral, Gabriel Coscas, Eric Souied - OCT Angiography biomarkers in remission nAMD

17.08 - Karim Raafat - Value of OCT angiography in detecting CNV complicating macular dystrophies and degeneration

17.15 - Discussion

24. NON EXUDATIVE; QUIESCENT CNV, OTHER CNV -PCV

Chair: Leila El Matri, Benjamin Wolff, Adil El Maftouhi

17.20 - Fenghua Wang, Qivu Bo, Philp J. Rosenfeld, Xiaodong Sun - Polyps in polypoidal choroidal vasculopathy appear as vascular structures using Swpt-Source OCTA

17.27 - Benjamin Wolff, Laurent Castelnovo, Sarah Mrejen, Vivien Vasseur, Guillaume Michel, Martine Mauget-Faÿsse - Subretinal OCTA hyper reflective signal in central serous chorioretinopathy: newvessels or not?

17.34 - Adil El Maftouhi - Non exudative CNV in OCTA: new insight?

17.41 - Leila El Matri - OCT - Angiography in quiescent choroidal neovascularisation not related to AMD

17.48 - Karim Raafat - The role of OCT Angiography in non-exudative "silent" choroidal neovascularization (CNV)

17.55 - Isil Sayman Muslubas, Serra Arf, Mumin Hocaoglu - Membrane patterns in eyes with choroidal neovascularization on Optical Coherence Tomography Angiography

18.02 - Céline Giraud, Catherine Favard, Vivien Vasseur, Benjamin Wolff, Martine Mauget-Faÿsse - OCT-A PCV classification

18.09 - Discussion

18.15 - End of the sessions

HALL D

25. QUANTITATIVE OCTA 1

Chairs: Richard Rosen, Amir Kashani

14.14 - Daniel Pauleikhof - Mathematical characterization of CNV in AMD with OCT Angiography

14.00 - Amir Kashani - Quantitative OCTA metrics for assessing DR progression

14.07 - Diogo Reis Cabral, Florence Coscas, Telmo Pereira, Alexandre Pardinielli, Alexandra Miere, Alexandre Sellam, Sandra Barrão, Gabriel Coscas, Eric Souied - Quantitative OCT Angiography for neovascular age related macular degeneration: six months follow-up study

14.21 - Marion Munk - Cataract significantly influences quantitative measurements on swept-source Optical Coherence Tomography Angiography imaging

14.28 - Discussion

26. MEASUREMENTS OF CAPILLARY DROP OUT IN DIABETIC RETINOPATHY

Chairs: José Cunha Vaz, Richard Rosen

14.33 - Luis Mendes

14.40 - Giuseppe Querques

14.47 - Richard Rosen

14.54 - Alain Gaudric, Benedicte Dupas

15.01 - José Cunha Vaz - Capillary dropout and disease progression

15.08 - Discussion

27. VESSEL DENSITY: RELIABILITY AND LIMITATIONS

Chairs: Alain Gaudric, David Sarraf, José Cunha Vaz, Joseph Carroll

15.13 - Ramin Tadayoni, Aude Couturier - Comparison between capillary perfusion on UWF FA and capillary flow detection of WF SwS OCTA

15.20 - Nadia K. Waheed - Quantifying microvascular changes in diabetic eyes

15.27 - Benedicte Dupas - Accelerated loss of retinal capillaries in ischemic maculopathy

15.34 - Richard Rosen - FAZ metrics or vessel density: what are the best parameters to measure capillary non-perfusion?

15.41 - Khalil Falavarjani, David Sarraf - FAZ and macular vascular density after Anti VEGF for CME

15.48 - Discussion

28. QUANTITATIVE ANALYSIS

Chairs: Richard Rosen, Suqin Yu

15.53 - Lisette Smid, Chantal Willems, Mirjam van Velthoven, Koen Vermeer - Quantitative analysis of RAP lesion size on OCTA images

16.00 - Ana Catarina Rodrigues, Diogo Cabral, Telmo Pereira, Hemaxi Narotamo, Marta Vila-Franca, Paulo Rosa, Sandra Barrão, Florence Coscas - Quantitative automatic analysis of choroidal neovascularization blood flow aspect

16.07 - Richard Rosen, Srinivas Sadda, Barbara Blodi - Factors in developing normative OCTA databases

16.14 - Toco Chui, Richard Rosen, Amani Fawzi, Mahnaz Shahidi, Barbara Blodi - Image metrics and biomarkers in OCTA imagery

16.21 - Discussion

29. PEDIATRICS

Chairs: Xavier Zanlonghi, José M^a Ruiz Moreno, Ourida Ouhadj, Leila Vajzovic

16.26 - María Alarcón, Bachar Kudsieh, Esther Casado, José M^a Ruiz Moreno - Macular and peripapilar vascular changes measured by OCTA in children with optic nerve drusen

16.33 - Rachid Chigara, Amine Haddad, Ourida Ouhadj - Intravitreal anti-VEGF in retinopathy of prematurity management

16.40 - Isa Sobral - OCTA in Amblyopia

16.47 - Lejla Vajzovic - Portable Optical Coherence Tomography Angiography: a new tool for evaluating retinal diseases in infants and children

16.54 - Rachid Chigara, Amine Haddad, Youcef Ouldbouamama, Imaddedine Nabil Taibi, Ourida Ouhadj - Intravitreal anti-VEGF monotherapy in retinopathy of prematurity management, a case series of our first10 eyes

17.01 - Camelia Margareta Bogdanici, Marina Cidu, Otilia Obada - OCT examination for emetropic and amblyopic children

17.08 Discussion

17.13 - End of the sessions

SATURDAY - MORNING

HALL A

8.00 – 8.45 – IMAGE INTERPRETATION SYMPOSIUM OPTOVUE

Moderator: Bruno Lumbroso

Bruno Lumbroso - Introduction

Adil El Maftouhi - OCTA pre and per-acquisition tips: when to dilate the pupil? How to acquire images in the periphery and of the anterior segment? Etc.

Marco Rispoli - If it isn't blood flow then what is it? Differentiating hyperreflective materials and suspended particles in motion from Erythrocytes movement

Alexandra Miere - D PAR: Rip projection artifacts

Luca Di Antonio - Post acquisition image interpretation routine: segmentation check and editing, ruling out artifacts, quantifications, etc.

30. ADVANCES IN OCT/OCTA TECHNOLOGY1

Chairs: James G. Fujimoto, Ravi Jonnal

8.50 - Claude Boccara - Cellular resolution imaging of the eye structures by full field OCT

8.57 - Ravi Jonnal - Measuring photoreceptor morphology and function with adaptive optics OCT

9.04 - Micheal Pircher - Micro-Angiography through adaptive optics optical coherence tomography

9.11 - Yoshiaki Yasuno, Shuichi Makita - Simplified polarization sensitive for simultaneous imaging of RPE and vascular abnormalitie

9.18 - James G. Fujimoto - Advances in speed and resolution in SS-OCT and SD-OCT

9.25 - Discussion

31. ADVANCES IN OCT/OCTA TECHNOLOGY2

Chairs: James G. Fujimoto, Ruikang Wang

9.30 - Ruikang Wang - Quantitative imaging of choriocapillaris using swept source OCTA

9.37 - Yoshiaki Yasuno, Shinnosuke Azuma, Deepa Kasaragod - Segmentation of retinal tissue using polarization sensitive OCT

9.44 - Eric Moulton - Variable interscan time analysis OCTA for assessing retinal and choriocapillaris vasculature

9.51 - Peter Koch - A compact full-field OCT device for home-care applications

9.58 - Tao Yuankai - Intraoperative OCT

10.05 Discussion

32. TECHNOLOGICAL DEVELOPMENTS BY CLINICIANS AND ENGINEERS

Chairs: James G. Fujimoto, Wolfgang Drexler, Philip J. Rosenfeld

10.10 - Optovue - Quienyuan Zhou - AngioVue version 2018.0 Software performance study

10.17 - Zeiss - Mary Durbin - Practical aspects of artificial intelligence in ophthalmic imaging

10.24 - Nidek - Riccardo Ferraris de Gaspare - Next phase of Nidek OCT

10.31 - Topcon - Charles Reisman - Latest Advances in OCT and OCT-Angiography

10.38 - Heidelberg Engineering - TBC

10.45 - Canon - Ori Zahavi: State of the art OCTA imaging

10.52 - Eidon - TBC

10.59 - Optopol - **Bartosz Sikorski** - Biometry and Keratometry OCT in clinical practice

11.06 - Maculogix - TBC

33. HISTOLOGICAL VALIDATION OF OCT SIGNATURES IN AMD

Chairs: Christine A. Curcio, K. Bailey Freund

11.13 - **Christine A. Curcio** - Optimizing tissue recovery, preparation, and microscopy of human donor eyes for imaging-histology correlations in AMD

11.20 - **Rosa Dolz-Marco** - Clinicopathologic correlation of geographic atrophy in AMD

11.27 - **Daniela Ferrara** - What did we learn about GA from clinicopathologic correlation?

11.34 - **Miaoling Li** - Clinicopathologic correlation of aneurysmal type 1 neovascularization (aka PCV) in AMD

11.41 - **Belinda C.S. Leong** - RPE migration in AMD

11.48 - **Serena Fragiotta** - Eye-tracked OCT identifies the origin of highly reflective cholesterol crystals in non-neovascular AMD

11.55 - Discussion

34. HISTOLOGY WORTH PAYING ATTENTION TO, FOR OCT

Chair: Christine A. Curcio

12.00 - **Gerard A. Luty** - Choriocapillaris health and degeneration at different stages of AMD

12.07 - **Dennis M. Dacey** - A connectomics approach to understanding variation in human foveal morphology

12.14 - **Andreas Pollreisz** - Reflective organelles in human RPE visualized via volume electron microscopy

12.21 - **John M. Nickerson** - Retinal pigment epithelium morphology in experimental wound healing treatment

12.28 - **Benjamin S. Sajdak** - Imaging-histology correlations in cone-dominated retinas

12.35 - Discussion

35. PATHOPHYSIOLOGICAL MECHANISMS IN THE RETINAL CAPILLARY PLEXUS

Chairs: David Sarraf, Michel Pâques, David Huang

12.40 - **Ramin Tadayoni** - Physiological considerations in understanding ischemia progression in the retinal capillary plexus

12.47 - **Michel Pâques** - Arterial inflow and venous outflow in the retinal capillary plexus

12.54 - **David Sarraf** - The ischemic cascade in the retinal capillary plexus

13.01 - **Francesco Pichi** - Cilio artery insufficiency always causes PAMM

13.08 - Discussion

13.15 - 14.15 - **Lunch break**

13.15 - 14.00 - **TOPCON LUNCH SYMPOSIUM**

HALL B

8.00 - 8.45 - **ZEISS SYMPOSIUM**

OCT-A cases routine to extreme

Speakers: Philip J. Rosenfeld, Marion Munk, Giuseppe Querques

36. CONTROVERSIES REGARDING THE NORMAL CIRCULATION

Chair: Srinivas Sadda

- 8.50 - **David Huang** - Organization and nomenclature for the retinal circulation
- 8.57 - **David Sarraf** - The retinal capillaries are organized in series.
- 9.04 - **Srinivas Sadda** - New insights into the retinal circulation revealed by high-resolution OCT-A
- 9.11 - **Joseph Carroll** - Foveal avascular zone metrics variability in Optical Coherence Tomography Angiography
- 9.18 - Discussion

37. IMAGING 1

Chairs: Carl Glittenberg, Leonardo Mastropasqua, Paolo Lanzetta, Jean Michel Muratet, Suqin Yu

- 9.23 - **Carl Glittenberg** - Fusing Swept Source OCT-A flow data with structural Swept Source OCT data to increase diagnostic quality
- 9.30 - **Leonardo Mastropasqua** - Widefield swept-source OCT Angiography in diabetic retinopathy
- 9.37 - **Jean-Michel Muratet** - Oct Angiography and non midiatric confocal retinography
- 9.44 - **Rishard Rami Weitz** - New recent innovations in the field wide-field retinal imaging
- 9.51 - **Akihito Uji** - High contrast OCT angiography imaging using image averaging
- 9.58 - Discussion

38. WIDE FIELD IMAGING

Chairs: Paolo Lanzetta, Anat Loewenstein, Ursula Schmidt-Erfurth

- 10.03 - **Daniele Veritti** - Fundus imaging with true-color automated confocal widefield scanner and true-color ultra-widefield retinal camera
- 10.10 - **Srinivas Sadda** - Wide-field OCT angiography in diabetic retinopathy
- 10.17 - Discussion

39. ARTIFICIAL INTELLIGENCE IN RETINAL IMAGING 1 (INCLUDING OCTA AND OCT)

Chairs: Caroline Baumal, Anat Loewenstein

- 10.22 - **Ursula Schmidt-Erfurth** - The future of AI in retina
- 10.29 - **Hrvoje Bogunovic** - Fluid and function – an analysis by AI
- 10.36 - **Karl Csaky** - Human computational analysis input in machine learning of OCT images
- 10.43 - **Sunny Virmani** (*form Google Life Sciences*) - AI in retinal imaging
- 10.50 - Discussion

40. ARTIFICIAL INTELLIGENCE IN RETINAL IMAGING 2

Chairs: Ursula Schmidt-Erfurth, Paolo Lanzetta, Anat Loewenstein

- 10.55 - **Harald Schnidar** - Dermatology-diagnosis by artificial intelligence
- 11.02 - **Bianca S. Gerendas** - Automated diabetes screening
- 11.09 - **Ralf Huss** - Digital pathology: the definiens model
- 11.16 - **Daniel Rückert** - Digital brain analysis for Alzheimer's disease
- 11.23 - **Jens Thygesen** - RetinaLyze: artificial intelligence - Impact on screening and diagnostics now and in the future
- 11.30 - **Valentina Sarao** - Artificial intelligence and diabetic retinopathy screening
- 11.37 - Discussion

41. RETINAL VESSEL PATTERN AND DENSITY RELIABILITY AND LIMITATIONS

Chairs: Alain Gaudric, K. Bailey Freund

- 11.42 - Michel Pâques** - 3D organization of retinal capillary in pigs on confocal microscopy
11.49- David Huang - What is the right segmentation to isolate the 4 retinal capillary layers?
11.56 - Alain Gaudric - Normal vessel density in the macula, using projection artifact removal
12.03 - Mathias Salas - Role of AO OCTA in the assessment of retinal capillary anatomy
12.10 - K. Bailey Freund - Venous collaterals in sequelae of BRVO
12.17 - Mary Durbin - Repeatability of quantitative measurements of the choriocapillaris based on OCTA
12.24 - Valérie Krivosic - Familial retinal arterial tortuosity
12.31 - Discussion

42. OCTA EVALUATION OF THE CHORIOCAPILLARIS

Chairs: David Sarraf, Enrico Borrelli, Srinivas Sadda

- 12.36 - David Sarraf** - Pathoanatomical considerations in evaluation of the choriocapillaris and choroid
12.43 - Jay Duker - Vista imaging of the choroid in AMD
12.50- Enrico Borrelli - Swept Source OCTA evaluation of the choriocapillaris in AMD
12.57 - Srinivas Sadda - Future directions in the evaluation of the choroid
13.04 Discussion

13.10 - 14.15 - Lunch break

HALL C

43. OCT ANGIOGRAPHY AND WHITE DOT SYNDROMES

Chair: Albert Augustin

- 8.50 - Albert Augustin** - Update: OCT Angiography and multi-modal imaging in the diagnosis of White Dot-Syndromes
8.57 - Piergiorgio Neri - Acute posterior multifocal placoid pigment epitheliopathy and Birdshot
9.04 - Carreño Ester - Chorioretinopathy: Multi-modal evaluation with the aim of OCT Angiography
9.11 - Emiliano Di Carlo - The role of OCT Angiography in the management of punctate Inner choroidopathy and serpiginous choroiditis
9.18 - Francesco Pichi - Multi-modal imaging approach to multiple evanescent White Dot Syndrome
9.25 - Discussion

44. NEUROOPHTHALMOLOGY 3

Chairs: Albert Augustin, Amar Ailem, Gilda Cennamo

- 9.30 - Amar Ailem** - Neuropathies optiques inflammatoires et OCT
9.37 - Umur Kayabashi - Novel SD-OCT and OCT-A findings in Alzheimer's, Parkinson's and MS
9.44 - Gilda Cennamo - OCTA detects retinal vascular alterations in different phases of Multiple Sclerosis
9.51 - João Pedro Marques - Peripapillary and macular neurovascular coupling in dominant Optic Atrophy
9.58 - Discussion

45. MACULAR EDEMA

Chairs: Amir Kashani, Michel Pâques

- 10.03 - Amir Kashani** - Retinal vascular changes associated with macular edema

10.10 - Michel Pâques - Photoreceptor misalignment: a common complication of macular edema

10.17 - Edoardo Midena - The pathophysiology of early diabetic retinopathy the integration of OCTA and retinal function tests

10.24 - Marion Munk - The impact of GCL cysts in DME

10.31 - Discussion

46. SURGERY

Chairs: Sanislao Rizzo, Frank Becquet, Jean François Le Rouic, Gabriele Thumann, Barbara Parolini

10.36 - Stanislao Rizzo - Macular hole: an integrated evaluation with OCT Angiography and microperimetry

10.43 - Michael Engelbert-Talia Kaden, Belinda Leoung - Swept Source OCT *En-face* imaging of vitreous reveals topographic relationship of premacular bursa, Cloquet's canal, prevascular vitreous fissures and cisterns

11.00 - Frank Becquet, Sandra Delaunay, Jean-François Le Rouic, Idriss Badat, Elisabeth Hermouet-Leclerc, Caroline Pousset-Decré, Pascal Peronnet - Inverted flap technique postoperative features of retinal surface after inverted flap, foveal sparing or free ILM patch technique for macular hole repair

11.07 - Nesrine Abroug, Imen Ksaa, Wejdane Nabi, Sana Sayadi, Bechir Jelliti, Sana Khochtali, Moncef Khairallah - Perifoveal vascular changes after successful rhegmatogenous retinal detachment repair: A SS OCT Angiography study

11.14 - Barbara Parolini - Possible classification and treatment of traction myopic maculopathy

11.21 - Gabriele Thumann - The "Ala Octa" incident: serious retinal toxicities after using a European-wide approved perfluorooctane

11.28 - Heijan J. Ng, Diederik Feilzer, Ellen C. La Heij, Koenraad A. Vermeer - Repeatability of vessel density measurement with OCTA in patients after retinal detachment surgery

11.35 - Discussion

47. ONCOLOGY

Chairs: Leonidas Zografos, Michel Puech

11.40 - Leonidas Zografos - OCT-Angiography guided treatment of irradiation induced maculopathy. Long term results and new treatment planning

11.47 - Neda Abraham, Karine Hawa, Michel Puech - Small choroidal pigmented lesions: OCT-A and ultrasound imaging correlation

11.54 - Sofia Sousa Mano, Filipa Teixeira Joaquim, Prates Canela, Filomena Pinto - Optical coherence tomography of circumscribed choroidal hemangioma

12.01 - Sofia Sousa Mano, Raquel Esteves Marques, Ana Fonseca, Fátima Campos Filomena Pinto - Spectral-domain optical coherence tomography of retinal hamartomas in tuberous sclerosis

12.08 - Discussion

48. IMAGING 2

Chairs: Leonardo Mastropasqua, Paolo Lanzetta, Jean Michel Muratet

12.13 - Tianwei Qian, Tianyu Cheng, Hao Zhou, Xiaoli Yu, Suqin Yu, Xun Xu - Clinical applications of wide-angle OCT Angiography in retinal vascular diseases using montage angio model

12.20 - Pasquale Viggiano, Federica Evangelista, Enrico Borrelli, Leonardo Mastropasqua - Wide field Optical Coherence Tomography Angiography of the choriocapillaris in healthy eyes

12.27 - Rishard Rami Weitz - Time elapsed studies of retinal vasculature using AO SLO - What do they tell us?

12.34 - Tunde - Assessing retinal vascular biomarkers for Alzheimer's disease using ultra-widefield imaging

12.41 - Sobha Sivaprasad - What is the significance of the peripheral vascular anomalies on ultra-widefield fluorescein angiography

12.48 - Philipp Roberts - Imaging of the RPE using widefield and eyetracking

12.55 - Discussion

13.00 – 14.15 Lunch break

HALL D

49. CLINICAL OCT ANGIOGRAPHY TODAY

Chairs: Lee Jampol, Amani Fawzi, Pascal Peronnet

8.50 - Lee Jampol, Amani Fawzi, Al Fayed - Is OCT Angiography a requirement for care of patients at the present moment

8.57 - Omar Trabelsi - OCT in 2018: advantages and limits

9.04 - Pascal Peronnet, Jean François Le Rouic - Two-year management of age-related macular degeneration without Angiography

9.11 - Ajit K. Thakur - OCTA- An important diagnosing tool for chorioretinal pathology': a case series from Nepal

9.18 - Discussion

50. OCT/OCTA AS AN ENDPOINT FOR CLINICAL TRIALS

Chairs: Caroline Baumal, Karl Csaky, Philip J. Rosenfeld

9.23 - Philip J. Rosenfeld - OCTA in prospective clinical studies (get all the reading centers involved and investigators)

9.30 - Discussion

51. IMAGING OUTCOMES AND ENDPOINTS IN RETINAL VASCULAR DISEASE AND UVEITIS CLINICAL STUDIES

Chairs: Vishali Gupta, Itay Chowers, Diana Do, Quan Dong Nguyen, Tien Ying Wong

9.35 - Diana V. Do - OCT outcomes in patients with neovascular AMD treated with Brolucizumab

9.42 - Elisabetta Miserocchi - Multimodal outcomes for vitreoretinal lymphoma

9.49 - Darius Moshfeghi - Pseudo geographic atrophy in chronic VEGF-inhibition in macular degeneration

9.56 - Quan Dong Nguyen - Posterior segment inflammatory outcomes in the STOP-UVEITIS Study

10.03 - Ruwan Silva - Intra-operative OCT outcomes in patients with maculopathies

10.10 - Vishali Gupta - Imaging outcomes in ocular tuberculosis

10.17 - Rupesh Agarwal - Imaging changes in choroid as outcomes of uveitis clinical trials

10.24 - Discussion

52. IMAGING PEARLS FROM READING CENTERS ON RETINAL DISEASES IN CLINICAL TRIALS – A SYMPOSIUM

Moderators: Quan Dong Nguyen, Philip J. Rosenfeld

10.29 - Barbara Blodi - Neovascular AMD

10.36 - Nadia K. Waheed - Geographic atrophy

10.43 - Yasir J. Sepah - Diabetic retinopathy

10.50 - Sebastian Wolf - Diabetic macular edema

10.57 - Michael Ip, Srinivas Sadda - Retinal vein occlusion
11.04 - Discussion

53. PACHYCHOROID-CSC

Chairs: K. Bailey Freund, Royce W. S. Chen, Joanna Golebiewska, Irmela Mantel, Maddalena Quaranta El Maftouhi

11.09 - Royce W. S. Chen - OCT-Angiographic distinctions between neovascular age-related macular degeneration and central serous retinopathy

11.16 - Joanna Gołębiewska, Joanna Brydak-Godowska, Monika Turczyńska - Correlation between choroidal neovascularization shown by OCT - Angiography and choroidal thickness in patients with chronic central serous chorioretinopathy

11.23 - Elisabeth Hermouet - Multimodal imaging of peripapillary pachychoroid syndrome

11.30 - Attila Kovacs, Rozsa Degi - Was this really wet AMD I treated? – case reports of pachychoroid neovasculopathies

11.37 - Khaled Romdhane, Irmela Mantel - Intravitreal anti-VEGF injections for choroidal neovascularisation complicating central serous chorioretinopathy: treatment outcomes assessed on multimodal imaging including Optical Coherence Tomography Angiography

11.44 - Monia Cheour, Meriem Ouederni, Hela Sassi, Fehmy Nefaa, Mouna Bellaaj, Jihen Brour - OCT Angiography monitoring of choroidal neovascularisation in chronic central serous chorioretinopathy after anti-VEGF treatment

11.51 - Dmitrii Maltsev, Alexei Kulikov, Jay Chhablani - Optical coherence tomography-guided identification of leakage point in central serous chorioretinopathy: a base for fluorescein Angiography-free focal laser photocoagulation

11.58 - Rim Maalej, Imène Zhioua Braham, Mejdi Boukari, Hela Kaouel, Ilhem Mili Boussem - Optical Coherence Tomography Angiography in an atypical case of central serous chorioretinopathy complicated by retinal neovascularisation

12.05 - Mark Nelson - Type 1 occult membrane, pachychoroid spectrum of disease, and CNV

12.12 - Maddalena Quaranta El Maftouhi - Follow up of Pachychoroid after PDT in CSC by OCTA

12.19 - Eleni Nikolopoulou, M. Lorusso, L. Micelli Ferrari, Tommaso Micelli Ferrari - Changes in choriocapillary flow after treatment in patients with pachychoroid pigment epitheliopathy

12.27 - Discussion

12.35 – 14.15 Lunch break

HALL E

54. QUICK FIRE

Anita Leys, Martine Mauget Fajsse, Gabriele Thumann

8.50 - Sara Vaz-Pereira, Luís Collaço - Multimodal imaging of retinal arteriovenous malformation in Wyburn-Mason syndrome

8.55 - Sandrine Zweifel - Swept source Optical Coherence Tomography findings in patients with Fabry disease

9.00 - Kais BenAbderrahim - Corneal lesions caused by desert truffles

9.05 - Inge Sarens, Julie Jacobs, Anita Leys - A heavy smoker with bilateral nAMD at age 60

9.10 - Corinne Dot, Hussam El Chehab, Mathis Thibaud, David Bellocq, Emilie Agard, Laurent Kodjikian - Multimodal imaging and swept-source OCT-A in choroidal osteoma complicated by quiescent neovascularization: a case study

- 9.15 - Hela Sassi, Jihen Brouer, Meriem Ouederni, Asma Hassairi, Monia Cheour** - The use of multimodal imaging in the monitoring of acute posterior multifocal placoid pigment epitheliopathy
- 9.20 - Fatiha Karaouat, Rachid Garout** - IRVAN or IRAA Syndrome? That is the question
- 9.25 - Nagihan Ugurlu** - Assessing foveal avascular zone and vessel density in paracentral acute middle maculopathy
- 9.30 - H. Nicolai, Julie Jacobs, Anita Leys** - Correlation of ICGA and OCTA in PCV with pulsating aneurysms before and after PDT

55. TELANGIECTASIA

Chairs: Daniel Pauleikhoff, Ethan Priel, Thomas Theelen, Leila El Matri, Constantin Pournaras

- 9.35 - Bernardes João, Miguel Raimundo, Cláudia Farinha, Maria da Luz Cachulo, Isabel Pires, João Figueira, Rufino Silva** - Qualitative and quantitative OCT Angiography characterization of macular telangiectasia type 1
- 9.42 - Zhao Yue, Yao Jin** - Quantitative OCT Angiography in the evaluation of anti-VEGF treatment effect in macular telangiectasia type 1
- 9.49 - Thomas Theelen, Anita de Breuk, Vivian Schreur, Michel Teussink, Carel Hoyng** - Vascular flow changes in macular telangiectasia type 2 in Optical Coherence Tomography Angiography
- 9.56 - Elena Pedanova, Dmitry Buryakov** - Macular Telangiectasia 2, retinal angiomatous proliferation (RAP) or branch retinal vein occlusion (BRVO)? Use of multimodal imaging for differential diagnosis
- 10.03 - Nina Lutsenko, Olga Rudycheva, Oxana Isakova, Tatyana Kyrylova, Natalya Unguryan** - Our experience of Optical Coherence Tomography-Angiography in the diagnosis of type 2 macular telangiectasia
- 10.10 - M. Giray Ersöz, Murat Karacorlu** - Macular telangiectasia type 2: acircularity index and quantitative assessment of foveal avascular zone using Optical Coherence Tomography Angiography
- 10.17 - Constantin Pournaras** - OCT-A guided focal photocoagulation of perifoveal telangiectasias
- 10.24 - Rania Estawro** - Monitoring macular telangiectasia type 2 by OCTA
- 10.31** - Discussion

56. PERIPAPILLARY VASCULARIZATION -GLAUCOMA 3

Chairs: Michel Puech, Svetlana Zhukova

- 10.36 - Gyu-Nam Kim, Eun-Ji Lee, Tae-Woo Kim** - Dynamic range of the peripapillary retinal vessel density for detecting glaucomatous visual field damage: comparison with the circumpapillary retinal nerve Fiber layer thickness
- 10.43 - Michel Puech, Mourtaza Aimadaly** - OCT-A and radial peripapillary vascularisation in glaucoma: structure and function analysis
- 10.50 - Svetlana Zhukova, Tatiana Iureva** - Assessment of the condition of the Zinn-Haller arterial ring vessels as an additional diagnosis criterion for Glaucoma associated with Myopia
- 10.57 - Etienne Bodart** - Relationship between intra-ocular pressure and macular and papillary retinal capillary flows
- 11.04 - Meriem Ouederni, Insaf Mrad, Hela Sassi, Monia Cheour** - Assessment and variability of the iridocorneal angle: an anterior segment Optical Coherence Tomography study
- 11.11** - Discussion

57. MISCELLANEOUS

Chair: Luca Di Antonio

11.16 - Luca Di Antonio - OCTA vascular changes and aqueous humor cytokines changes after Aflibercept intravitreal injection in treatment-naive myopic CNV

11.23 - Kaushal Vairagi, Pooja Gupta, Amit Pandey, Umesh K Tiwari, Samir K Mondal - Extended depth of focus and high lateral resolution in Optical Coherence Tomography imaging using deep seated negative axicon

11.30 - Ahmad Masoomi, Houshang Faghihi, Poursan Fadaka, Masoud Mirghorbani,

11.37 - Mojtaba Abrishami - Corneal lubrication effects on image quality of OCT Angiography

11.44 - Discussion

11.50 - End of the sessions

SATURDAY AFTERNOON

HALL A

58. MULLER CELL IN MACULAR DISEASE

Chair: David Sarraf

14.15 - Christine A. Curcio - Muller Cell in macular disease: clinicopathologic concepts and correlations

14.22 - Andrea Govetto - The Muller Cell and the development of macular tractional disorders: an experimental model of mechanical force transmission

14.29 - Giulia Corradetti - Muller cell footplates: can they be detected with *En face* OCT?

14.36 - Eduardo Navajas - Progression of inner retinal dimples after ILM removal

14.43 - David Sarraf - Summary of the clinical implications of Muller cell maculopathy

14.50 - Jean Pierre Hubschmann - Microcystic degeneration in CRVO and how it impacts the prognosis in CRVO associated CME

14.57 - Discussion

59. CORRELATION BETWEEN IMAGING AND MOLECULAR BIOMARKERS

Chairs: Yasir J. Sepah, Aniruddha Agarwal, Quan Dong Nguyen

15.02 - Alessandro Invernizzi - Choroidal imaging biomarkers in white Dot Syndrome

15.09 - Aniruddha Agarwal - OCT-Angiography for choroiditis

15.16 - Yasir J. Sepah - Correlation between interleukin levels in the anterior chamber fluid and anatomic response in DME subjects treated with Ranibizumab

15.23 - Itay Chowers - Fundus autofluorescence patterns and genetics in retinal degenerations

15.30 - Syed Mahmood Shah - Imaging and molecular biomarkers in retinitis pigmentosa

15.37 - Vinit Mahajan - Imaging and molecular biomarkers in inherited maculopathies

15.44 - Discussion

60. CLINICAL APPLICATIONS OF ADAPTIVE OPTICS OPHTHALMOSCOPY – WHAT ARE THE LATEST?

Chairs: Alfredo Dubra, Don Miller, Quan Dong Nguyen

15.49 - Robert Zawadzki - Functional OCT in retinal imaging in basic science

15.56 - Ravi Jonnal - TBD

16.03 - Alfredo Dubra - How reflectance and multiple scattering Adaptive Optics Ophthalmoscopy can help to interpret clinical OCT

16.10 - Michael Pircher - Adaptive Optics Optical Coherence Tomography: from basic research to clinical applications

16.17 - Don Miller - TBD

16.24 - Discussion

61. RETINAL LEAKAGE

Chair: José Cunha Vaz

16.29 - João Pedro Marques - OCT-Leakage. A non-invasive alternative to Fluorescein Angiography

16.36 - José Cunha-Vaz - OCT-leakage. Role in the characterization of retinal edema

16.43 - Claudia Farinha - OCT-Leakage in neovascular AMD. Identification of CNV activity

16.50 - Discussion

16.55 - End of the sessions

HALL B

62. CHOROID 1 STUDY BY SS OCT AND OCTA

Chair: José M^a Ruiz Moreno

14.15 - Francine Behar-Cohen, Rufino Silva, Luis Arias, Jorge Ruiz-Medrano, Flores Iñaki - Choroid in CSCR

14.22 - Rufino Silva - Choroid in polypoidal vasculopathy

14.29 - Luis Arias - Choroid in RAP

14.36 - Jorge Ruiz-Medrano - Choroid in atrophic AMD

14.43 - José M^a Ruiz Moreno, Jorge Ruiz-Medrano, Juan Manuel López-Villalta - Vascular density study by OCTA: age related changes

14.50 - Flores Iñaki, José M^a Ruiz Moreno - Choroid study by SS-OCT and A-OCT in myopic choroidal neovascularization

14.57 - Discussion

63. OCTA IN GLAUCOMA 1

Chairs: David Huang, Natalia I. Kuryшева, Richard Rosen, Gabor Hollo

15.02 - David Huang - Simulating visual field with OCTA

15.09 - David Huang - Localizing Glaucoma damage with OCTA

15.16 - Linda Zangwill - Utility of OCTA from early to late Glaucoma

15.23 - Natalia I. Kuryшева - OCTA in the prediction of Glaucoma

15.30 - Richard Rosen - Quantitative OCTA for Glaucoma assessment

15.37 - Gabor Hollo - Detecting Glaucoma progression with OCTA

15.44 - Tomita Goji - Focal macular ERG and OCTA in early Glaucoma

15.51 - Discussion

64. OCTA IN GLAUCOMA 2

Chairs: David Huang, Michel Puech, Natalia I. Kuryшева, Sanja Sefić Kasumović

15.56 - Sanja Sefić Kasumović, Aida Kasumović, Tarik Halimić, Nesina Avdagić - Assessment of perfused peripapillary capillaries and PCD maps in Glaucoma patients

16.03 - Umur Kayabashi - Detection of pre-perimetric POAG by OCT macular ganglion cell complex analysis and OCT-A of optic nerve fiber layer. A comparison of both methods

16.10 - Theodoros Filippopoulos, Sotiria Palioura - Filtration bleb wound healing monitoring with anterior segment Optical Coherence Tomography (OCT) and OCT Angiography after guarded trabeculectomy

16.17 - Lila Hafiz - Interest of macula exploration in Glaucoma patients

16.24 - Discussion

65. TECHNOLOGY

Chairs: Adrian Podoleanu, Francine Behar-Cohen

16.29 - Adrian Podoleanu, Adrian Bradu, Manuel Marques, Ramona Cernat - Progress in the fast display of *en-face* OCT images

16.36 - Timothe Laforest, Dino Carpentras, Mathieu Künzi, Laura Kowalczyk, Francine Behar-Cohen, Christophe Moser - Cellular resolution retinal pigment epithelium imaging with transscleral optical phase imaging (TOPI)

16.43 - Discussion

66. ONCOLOGY OPTIC DISC

Chairs: Leonidas Zografos, Jakub Kaluzny

16.48 - Michel Pâques, Sarah Tick - Radiation retinopathy and choroidopathy: new insights from multimodal imaging

16.55 - Raffaele Parrozzani - OCTA peripapillary circulation in radiation retinopathy

17.02 - Jakub J. Kaluzny, Przemysław Zabel, Martyna Gębska Toloczko, Karolina Suwała, Monika Wilkosc Debczynska, Aleksander Araszkiwicz, Martyna Kaluzna - OCTA of the optic nerve head and macula in patients with Alzheimer's disease and Glaucoma

17.09 - Neringa Jurkute Adnan Tufail, Pearse A. Keane, Andrew Webster, Patrick Yu-Wai-Man, Peter M. Maloca - In vivo vessel volume quantification in Leber's hereditary optic neuropathy (LHON) during the disease conversion and progression

17.16 - Leonidas Zografos - Iris ICG-Angiography in the diagnosis and management of anterior segment intra-ocular tumor

17.23 - Discussion

17.28 - End of the sessions

HALL C

67. OCTA AND BEYOND MULTIMODAL IMAGING IN UVEITIS: INSIGHTS INTO PATHOLOGY FROM TECHNOLOGY

Chair: Marion Munk

14.15 - Amir Kashani - Longitudinal analysis of retinal vascular changes in subjects with Uveitis

14.22 - Dilraj Grewal - Deep Learning Algorithm for the Diagnosis of Birdshot Chorioretinitis Using Fundus Photographs

14.29 - Francesco Pichi - Wide-field OCTA analysis of leakage in retinal vasculitis

14.36 - Michal Kramer - Inflammatory chorioretinopathies: what have we learned from OCT-A

14.43 - Debra Goldstein - Imaging in the assessment of disease activity in Birdshot

14.50 - Elisabetta Pilotto - Imaging inflammatory biomarkers: response to different treatments

14.57 - Discussion

68. HEREDITARY DISORDERS- RARE DISORDERS

Chairs: Isabelle Meunier, Daniela Bacherini, Luca Di Antonio

15.02 - Isabelle Meunier - OCT semiology in hereditary retinal dystrophie in early aging

15.09 - Daniela Bacherini, Andrea Sodi, Gianni Virgili, Stanislao Rizzo: Oct Angiography in retinitis pigmentosa

15.16 - Luca Di Antonio - OCTA findings in X-linked retinoschisis

15.23 - Discussion

69. INFLAMMATION 1

Chairs: Moncef Khairallah, Vishali Gupta Anna Wozniak, Martine Mauget-Faÿsse, Marion Munk

15.30 - Sourour Zina, Nesrine Abroug, Hajer Ben Amor, Anis Mahmoud, Sonia Zaouali, Sonia Attia, Moncef Khairallah - Swept-source OCT Angiography and uveitic cystoid macular edema

15.37 - Spoorti Krishna Reddy Mandadi, Navya Cherukuri, Bhavik Panchal, Shreyansh Doshi, Avinash Pathengay - OCT Angiography in post-fever vasculitis

15.44 - Catalina Dumitrescu - Review of OCT and OCTA role in Susac syndrome

15.51 - Martine Mauget-Faÿsse, Vivien Vasseur, Romain Deschamps - Acute macular neuropathy: a new risk factor

15.59 - Discussion

70. INFLAMMATION 2

Chairs: Moncef Khairallah, Vishali Gupta, Anna Wozniak, Martine Mauget-Faÿsse, Marion Munk

16.04 - Imen Ksiai, Sana Khochtali, Marouane Lahderi, Nesrine Abroug, Bechir Jelliti, Sonia Attia, Moncef Khairallah - Swept source OCTA findings in patients with systemic lupus erythematosus

16.11 - Sana Khochtali, Amal Kadri, Sourour Zina, Imen Ksiai, Bechir Jelliti, Sonia Attia Moncef Khairallah - Swept source OCT and OCTA in toxoplasmic retinochoroiditis

16.17 - Sumit Sharma - Arthi Venkat, Peter K. Kaiser, Ashley Balascoe, Kimberly Baynes, Careen Lowder, Sunil Srivastava - The use of Swept Source OCTA in patients with uveitis and retinal vasculitis

16.24 - Discussion

16.31 End of the sessios

HALL D

71. MICROVASCULATURE

Chairs: Vivien Vasseur, Zhao Yue, Lisa Toto

14.15 - Zhao Yue, Sun Guang Li, Yao Jin - Quantitative OCT Angiography for FAZ measurements in ischemic branch retinal vein occlusion as predictive factors for visual prognosis

14.22 - Rita Laiginhas, Pedro Pereira Rodrigues, João Chibante-Pedro, Manuel Falcão - OCT Angiography repeatability – evaluation of three approaches for microvasculature quantification

14.29 - Marta Alonso Plasencia, Abreu González, Díaz Rodríguez, Alberto Pestano, Gil Hernández - Foveal avascular zone parameters in diabetic eyes and healthy subjects measured by Optical Coherence Tomography Angiography

14.36 - Dmitrii Maltsev, Alexei Kulikov, Maria Burnasheva - Personalized analysis of foveal avascular zone with Optical Coherence Tomography Angiography

14.43 - Discussion

72. VASCULAR OCCLUSION

Chairs: Royce Chen, Alexandra Miere, Mojtaba Abrishami, Kotaro Tsubai

14.48 - Mojtaba Abrishami - OCT Angiography of retinal artery occlusion

14.55 - Kotaro Tsubai - Gap in capillary perfusion on OCT Angiography associated with persistent macular edema in branch retinal vein occlusion

15.02 - Alexandra Miere, Florence Coscas, Eric Souied - Retinal vein occlusion longitudinal Analysis of quantitative biomarkers using Optical Coherence Tomography Angiography

15.09 - Sen Piyali, Joan Nunez Do Rio, Carlo Di Nunzio, Sobba Sivaprasad - Optical Coherence Tomography Angiography: association of disorganization of retinal inner layers with quantitative microvascular analysis in central retinal vein occlusion

15.16 - Discussion

73. VASCULAR DISORDERS

Chairs: Royce Chen, Alexandra Miere, Mojtaba Abrishami

15.21 - Royce Chen - OCT-Angiography in adolescent sickle cell retinopathy

15.28 - David Cordeiro Sousa, Inês Leal, Susana Moreira, Patrícia Dionísio, Sónia do Vale, Ana S. Silva-Herdade, Miguel ARB Castanho, Luís Abegão Pinto, Carlos Marques-Neves - OCT-Angiography study of the retinal vascular autonomic response to the Handgrip test

15.35 - Discussion

74. DIABETIC RETINOPATHY

Chairs: Nadia K. Waheed, José M^a Ruiz Moreno, Caroline Baumal

15.40 - Malvika Arya, Marco Bonini Filho, Carl B. Rebhun, Eric M. Moulton, Byung Kun Lee, A. Yasin Alibhai, Andre J. Witkin, Caroline R. Baumal, Jay S. Duker, James G. Fujimoto, Nadia K. Waheed - Analysis of relative blood flow speeds in vascular changes of diabetic retinopathy using variable Interscan time analysis OCT Angiography

15.47 - Akihiro Ishibazawa, Lucas R. De Pretto, A. Yasin Alibhai, Malvika Arya, Osama Soror, Chris Or, Almyr Sabrosa, Caroline Baumal, Andre Witkin, Akitoshi Yoshida, Jay S. Duker, James G. Fujimoto, Nadia K. Waheed - Arterial or venous contribution for retinal non-perfusion in diabetic retinopathy observed using OCT Angiography

15.54 - José M^a Ruiz-Moreno, Javier Iturria, Elena Almazán - OCTA findings of early neurovascular damage in diabetics patients without diabetic retinopathy and non proliferative diabetic retinopathy

16.01 - Raja Zhioua, Imène Zhioua Braham - Analysis of the vitreomacular interface in treatment-naïve patients with diabetic macular edema: Swept-Source Optical Coherence Tomography study

16.08 - Discussion

75. DIABETIC RETINOPATHY

Chairs: Nadia K. Waheed, José M^a Ruiz Moreno, Maria Cristina Savastano

16.13 - Imène Zhioua Braham - OCT-Angiography findings in diabetic patients with and without diabetic macular edema: a comparative study

16.20 - Gholamali Naderian, Amirkhashayar Naderian, Keihan Ghavahi Kashani - OCT Angiography in Comparison with standard colour fundus photo to diagnose diabetic retinopathy

16.27 - Hela Kaoual, Imène Zhioua Braham - Correlation between microvascular abnormalities and severity of diabetic retinopathy using Optical Coherence Tomography Angiography

16.34 - Marta Alonso Plasencia, Abreu González, Afonso Rodríguez, Alberto Pestano, Gil Hernández - Structure-function correlation using OCT Angiography and microperimetry in diabetic retinopathy

16.41 - Nihal Hassan - Correlation between chorioidal thickness and OCT -A in diabetic patients using Triton Swept source OCT

16.48 - Discussion

IMAGE GALLERY AWARDS

Joe Carroll, Brandon Lujan

16.58 - End of the sessions
